

Data Sheet

AHF001/002/072/156/157 Oil Catch Tanks

Features

High strength, low weight, Oil Catch Tanks for Motorsport and fast road use.

Applications

Oil catch tanks in various sizes to satisfy both MSA and FIA regulations, commonly used in rally and circuit racing.

General Description

Fabricated from a mixture of 5251 and 6082 aluminium alloy, our oil catch tanks are both easy to mount on the vehicle and are the perfect balance of strength and low weight. Available in a choice of sizes to suit both car and motorcycle applications, with a choice of hose connection sizes.

We often also stock units with larger hose connections to suit applications with dry sump systems, please enquire.

Part Number	Capacity	Dimensions Unit mm	Dimensions Overall mm	Inlet	Outlet	Sight Tube	Weight
AHF001	3L	150w x 100d x 205h	162w x 103d x 249h	1/2"	1/2"	Yes	615g
AHF002	2L	100w x 100d x 205h	205w x 103d x 249h	1/2"	1/2"	Yes	495g
AHF072	1.5L	152w x 52d x 202h	197w x 90d x 251h	1/2" x2	5/8"	Yes	505g
AHF156	1L	101mm dia x 156mm	140w x 142d x 205h	1/2"	1/2"	Yes, FEP	400g
AHF157	1.5L	101mm dia x 206mm	140w x 142d x 255h	1/2"	1/2"	Yes, FEP	460g

Our oldest products, the AHF001 and AHF002 have been used in race and rally cars in almost every championship in the world. A firm favourite with home builders, they satisfy both MSA and FIA regulations for oil catch tanks.

A more recent product, the AHF156 & AHF157 are a modern design that use our high quality FEP level tube. Because the tube is clear, the oil level is very easy to see at a glance. All of our catch tanks are equipped with an M8 drain so they can be quickly and easily drained.
